

WorkIndiana: Indiana Department of Workforce Development

April 08, 2019

We have chosen the primary focus of this initiative as the innovative services. The WorkINdiana program for adult education students provides access to short-term training opportunities that lead to industry-recognized credentials in high-wage, high demand occupations. This program requires partnerships among adult education centers, career and technical education centers, WorkOne offices, community colleges, and local economic development representatives. Together, these partners determine the careers most relevant to their local areas and work to implement the requisite training programs. Students can choose from over 45 certifications including Advanced Manufacturing, Business Administration, Construction, Health Care, Hospitality, Information Technology, and Transportation and Logistics.
