Workforce ITSC Top 5 Procurement Portal Tips and Tricks

February 01, 2023

Technology-related procurements in the public workforce system have seen unprecedented growth in the last three years. 2020 saw more workforce technology procurements than the previous two years combined, and the number has increased in 2021 and 2022. The increase in procurements creates an extensive catalog that can aid state workforce agencies in technology procurement and digital transformation efforts. Users can explore Request for Proposal (RFP) language, stay up to date on industry trends, see which vendors are being awarded contracts, and identify agencies at the forefront of innovation.

The Workforce IT Support Center (Workforce ITSC) has identified ways to use the Procurement Portal more effectively and unlock its full potential.
